

SAT., JUNE 5, 1 PM GARDENING WITH NATIVE PLANTS

Supporting wildlife with native plants with Lyn Chimera

Lyn Chimera is a certified Master Gardener who has in-depth native plant expertise. During this informal talk, Lyn will answer questions like, What's a native plant? Why are they important? What will grow in Craneridge? In shade? How do we work with our deer population? Where can I learn more?

*There will be time for **your** questions too!*
